one object alone, at the skin limit
needed: about +5 K (37 to 42 °C)
our 140 nm carrier
1e-04 K
carrier or capsule
with rods in its wall
(∝ R)
Skirtach
capsules
one gold sphere alone (∝ R²)
steady temperature rise ΔT (K)
radius of the heated object (nm)
many carriers together (1 cm tumour)
rods, low blood flow
rods, typical
rods, high blood flow
spheres, typical
need +5 K
Nunes, after IV dose:
41 μg/g
rise at tumour centre ΔT (K)
gold in the tumour (μg per g tissue)
